**Subject No. 89.**
**Wanted a standard for Talavar Miras.**

*Summary of discussion.*—There should be one standard of miras payable to Talvars by raiyats.

*Dewan's reply.*—Do the raiyats all agree to pay miras to Talavars?

Mr. Nanjunda Rao (Representative from Davangere Taluk.) The raiyats do not agree. If necessary, the Deputy Commissioner may be asked to report. The system does not exist in the Bombay Presidency, and should not be made applicable to Mysore, where the Bombay system of settlements prevails.

*Dewan's reply.*—But the Madras and Bombay Presidencies have separate cesses. Whereas in Mysore, the mirasi system is in force. The subject will be considered and dealt with. (*Vide* Subjects Nos. 56, 131 and 163 of the Dasara Representative Assembly Proceedings for 1890).

**Subject No. 90.**
**Reduction of license fee on Salt pans.**

*Summary of discussion.*—The license fee per salt pan in the Chitaldroog Taluk is Rs. 20. This is too high and should be reduced to Rs. 10.

The Deputy Commissioner remarked that this rate of Rs. 20 is in force throughout the District, and in reply to an inquiry from the Dewan, stated that the license fee was not fixed by competition.

*Dewan's reply.*—No reason is explained for the reduction asked for. Under the orders of February 1880 (page 131 of the Revenue Manual) the license fee is to be fixed by the Deputy Commissioner, with reference to the productiveness of the locality. This is best ascertained under a system of competition at auction or by tenders, as was ordered for the Kolar District. The subject will be further considered.

**Subject No. 91.**
**Increase of Munsiffs' Jurisdiction.**

*Summary of discussion.*—The jurisdiction of Munsiffs should be raised so as to enable them to dispose of suits involving claims up to Rs. 2,000.

*Dewan's reply.*—The subject of raising the jurisdiction of Munsiffs where necessary will be considered. *Vide* also reply given to a similar representation from the Kadur District (see Subjects Nos. 84 and 115).

**Subject No. 92.**
**Chitaldroog Town water-supply.**

*Summary of discussion.*—Iron pipes should be laid from the tank in the rock of Chitaldroog to the town for the supply of water. It will cost Rs. 25,000. The Government should lend this amount to the Municipality, and recover the debt by yearly instalments of Rs. 500. Some lands along the margin of the channel from the tank in the Chitaldroog rock to the town, have been given out for cultivation. Their cultivation pollutes the water. The lands should be resumed.
